The Toilet Board Coalition is running a **six-month** Waste Logistics Innovation Lab to chart the market opportunity, financial and climate impacts of business models and technologies in the sanitation economy related to the collection and transportation of faecal sludge.

The Lab will run from **March to August 2022** and produce a Lab Report bringing together the lessons learned through the program, market review and call to action for investments and partnerships moving forward.

**WHO WE ARE LOOKING FOR**

- Startup and/or an existing company in the sanitation economy that collects or transports faecal sludge
- Operating in Sub-Saharan Africa
- Interested in participating in a six-month Lab with other businesses and global experts to share experiences and strengthen your business for growth

**WHAT THE INNOVATION LAB OFFERS**

- 6 months of program support and mentorship
- Exposure to the Toilet Board Coalition’s global network of businesses and investors
- Financial & climate analytics and recommendations for your business
- Showcasing of your experience and model in a global call-to-action report

**APPLICATION CLOSING DATE**

**5 MARCH 2022**

---

Innovation Labs are designed to catalyse market development around the specific technological, business model, geographic, and/or demographic areas of the sanitation economy. They offer opportunities to businesses at early and growth stages to engage and interact with the Toilet Board Coalition network. Innovation Labs are shorter in duration, lighter in engagement and work with earlier stage businesses than the TBC’s Accelerator.
