

# Accelerator Impact Story

2024 Cohort

Operating in Kenya

Circular Sanitation  
Marketplace

## ABOUT ALJULI ENGINEERING

Aljuli Engineering in Kenya builds onsite wastewater treatment systems using anaerobic reactors and planted gravel filters. These systems convert household wastewater into reusable irrigation water and biogas. The company also installs toilets connected to biodigesters, catering to schools, households, NGOs, and hotels.

## ALJULI'S IMPACT

\*2024 Impact

**50K** Lives Impacted daily

**4.5K** cubic meters treated wastewater

**1.5K** Tonnes of faecal sludge treated

## ALJULI'S 12 MONTH ACCELERATOR JOURNEY

Aljuli Engineering worked on digital marketing and exploring potential strategic partners.

### Mentor

Ademola Ajibade,  
Kimberly-Clark

*"The impact over the past year has been remarkable, both in mentoring and in expanding the organisation's exposure to new business opportunities. This has enabled them to reach a broader audience, both within their community and beyond."*

### Entrepreneur

Alfred Chombah,  
Aljuli

*"We have had a wonderful experience in the Accelerator. We worked closely with the Coalition team to work on the business development process and our mentors from Kimberly-Clark who supported us with marketing and social media strategies."*
