ABOUT KODU TECHNOLOGY

Ghana's Kodu Technology manufactures and sells affordable and environmentally friendly sanitary pads made from plantain and banana fibres, offering an affordable solution for women in rural areas. These biodegradable pads help cut down on plastic waste in landfills and oceans

KODU'S IMPACT

*2024 Impact

630 Lives Impacted daily

1.2K Pads of pads sold

37.5 Tonnes of pad waste treated

KODU'S 12 MONTH ACCELERATOR JOURNEY

Kodu Technology worked on value proposition, business expansion plans and investment readiness.

Mentor

Ademola Ajibade,
Kimberly-Clark

"This year marked a significant step forward in aligning the business processes with the organisation's needs through ongoing discussions. During my mentorship, I explored opportunities for business innovation, as well as crucial regulatory and compliance aspects."

Entrepreneur

Dr Iddi Faried,
Kodu Technology

My experience with the Toilet Board Coalition Accelerator has been a great one as I've met a lot of industry experts who have helped shape my business.
